## The Children's Museum of Indianapolis

The Children's Museum of Indianapolis  
 Riley Children's Health Sports Legends Experience  
 Indianapolis, IN

**Design:** KD-P, Michael Damschroeder  
**Fabrication:** Essential Architectural Signs

**iZone products used:** 1/2" exterior CHPL  
**Completion:** 2019

The Children's Museum of Indianapolis, largest children's museum in the world, opened a 7.5 acre outdoor expansion which would allow kids to see and experience sports and learn about some sports legends along the way.

The Riley Children's Health Sports Legends Experience features twelve outdoor sports experiences and three indoor exhibits. The exhibits focus on physical fitness and awe-inspiring sports history. Key to the virtual experience are durable signs and graphics. Designer Michael Damschroeder of KD-P specified iZone's Custom High Pressure Laminate (CHPL) for signs and graphics in high traffic areas.

A path winds through the park-like setting where children and their families are invited to run, drive, jump, putt, and play while learning to stay happy, healthy and safe. The \$38.5 million expansion features several options: miniature baseball field, hockey rink, football field, and Indy Motor Speedway. Visitors can also climb inside a massive 8' diameter tree trunk/tree house of sports featuring larger than life sports equipment and an intercom system for announcing to those below before you slide down to exit.

A project this scale called for dependability and cost effective solutions that could meet the tight deadline required. iZone Imaging accomplished the extraordinary and has helped make a lasting impression upon the sports community and the hearts of their fans.
