

# CASE STUDY

## City Park Signs

**Location:** Katy, TX  
**Designer/Fabricator:** Murr Incorporated

Located in Katy, Texas, Mayde Creek Park is an essential part of the city, connecting neighborhoods to schools and supplying recreation for the public. The park includes a hike and bike trail, playgrounds, and pavilions for events.

Being over 10 years old, the original park signage was showing its age. Sign panels were outdated and weathered from years of exposure to the Texas sun. The Mayde Creek Municipal Utility District decided it was time to replace the park signs with panels manufactured by iZone Imaging. Mayde Creek MUD wanted signage that would last and thrive in the sun and elements. They chose iZone because of the durability and colorfastness built into iZone CHPL material. iZone panels are graffiti, fade, and scratch-resistant, as well as impervious to moisture and thermally stable.

*“These folks work with us as “extensions of our office,” so when we need something, it feels like we are visiting with partners internally...folks within our workspace down the hall. When something is not right, they fix it...not fight it.” — Tara Terry - Murr Inc.*
