 Designer: MajaDesign, Inc.  
 Fabricator: 42 Design Fab

# CASE STUDY

## Visitor Center Interpretive Signage

One successful project often leads to another. The Lake Sunapee Protection Association (LSPA) heard about MajaDesign from another client, the Loon Preservation Committee out of Moultonborough, NH. LSPA had just completed renovations on a beautiful lakeside visitor center, and wanted interpretive panels to inform visitors about lake ecology and the role LSPA plays in monitoring and protecting watershed health. MajaDesign developed an interpretive plan outlining recommendations for two exhibit rooms and associated hallways, restrooms, and classrooms, then developed all interpretive panels for both 2-D and 3-D displays.

Special thanks to 42 Design Fab, who developed several 3-D features and installed all interpretive panels on site.

*"With every project we do with iZone, we continue to be pleased with the outstanding service and beautiful products they provide. It just gets better and better!"*

- Maja Smith, MajaDesign, Graphic Designer and Project Manager
