## CASE STUDY

### Whimsical Wall Display

Dr. Andrea Shelton, owner of Tinker Tooth Pediatric Dentistry, has always been a huge Disney fan (the name of her practice says it all!). After becoming a pediatric dentist, she set out to create an office that felt like a part of Disney. With the help of Lindsey Vincent of Lvincent Studios as well as iZone, this vision came to life. Patients now enter a welcoming office reminiscent of Disney's Boardwalk Resort and feel an overwhelming sense of excitement rather than anxiety.

Under the recommendation of Lindsey of Lvincent Studios, Dr. Shelton utilized iZone's CHPL to create the whimsical signage that would cover the walls of the office. The Custom High Pressure Laminate material provided high quality color and graphic clarity with excellent durability and simple maintenance.

Dr. Shelton would like to give special thanks to Lindsey Vincent. "Her expertise and creativity was exactly what I envisioned for the office, but better. I feel like I'm at Disney World every day."

In addition to Lindsey and iZone, Dr. Shelton would like to thank Mattingly Construction, Brandi Monard with 2ndstarIn, and Progress studios for all of their hard work in making this dream into a reality.
